Fuss & O'Neill is a civil and environmental engineering firm that provides client-specific, forward-thinking, and holistic solutions. Since 1924, we have made it our mission to improve the built and natural environments in response to our public and private clients' evolving needs.

For more than a century, our clients have trusted us to solve their most complex challenges. By offering a full suite of civil and environmental services, our licensed and certified professionals can design comprehensive solutions. We operate as a cohesive team; a team made of individuals dedicated to safety, science-based decision making, and providing our clients with fiscally-responsible results.

Our clients benefit from our holistic problem solving. We see the project both as a whole and as a series of steps. We can be involved in all phases of the project, and our multidisciplinary lens allows us to see challenges and resolutions from all perspectives – solving small matters before they become schedule-impacting problems.

Solve better. Go further.

Corporate Priorities

Our work is a reflection of our employees' sincerity and our company ethos.

We seek new perspectives because diverse experiences and ideas drive innovation and creativity.

We have long been stewards of our environment because it is simply the right thing to do.

We are community partners focusing on STEAM-related volunteerism to inspire the next generation of changemakers.

Everything we do is founded on a common commitment to a safety-first culture and continuous improvement.
